

## PRODUCT DETAILS FOR OIL BASED FLAVOURS

Our Flavoured Oils are highly concentrated so a little goes a long way. Oils are used to flavour chocolates, as they won't seize your chocolate like water based products will. Just a few drops are needed to create flavoured chocolate that will add a taste sensation to your creations.

As they are concentrated, Flavoured Oils can also be used to flavour cake batters, butter icings, cookie dough and fudges. They also can be used in other DIY crafts like candles, Lip Balms and bath bombs.

Make sure the flavoured oil is at room temperature before adding to other ingredients.

Oils should also be stored in the fridge to maximise their shelf life.

### **Baking & Dessert Application:**

Use it in baking and dessert applications, like cake & biscuit batters, icings, frostings, ice cream, cream and macarons.

It isn't a sweetener, so you may require additional sugars to taste, in your base ingredient (ie Milkshakes)

### **Chocolate / Lip Balm Applications:**

Once your chocolate / Lip Balm has melted, add one drop at a time tasting after each addition so you can customize to your preferred pallet. We recommend, **3 drops per 100g chocolate** as a starting point.

To assist the flavour to come out fully in Lip Balms, we recommend adding a sweetener to the Lip Balm Base

### **How Much:**

Dosage Rate - 2-3 Drops, or between 0.1-0.15%

Use an eye dropper for accurate measuring.

Once opened, stored in cool dry conditions away from direct sunlight and heat. Shelf life is greater than 24 months if stored correctly.

Suitable for Kosher dietary requirements

Not suitable for Halal dietary requirement

Suitable for Vegan & Vegetarian Dietary requirements

Made in Australia from imported ingredients.

Ingredients: Flavour

Varieties – Ingredients & Usage recommendations:

ALMOND: Dosage Rate: 0.10% - Ingredients: Flavour
